

SPECIFICATION OF CONIC TOOLING

■Conic Original Coating

Perfect tool for stainless steel !

Super Dry Punch (SDP)

This is our best tool. Incredible durability and defeated the common sense that "Stainless is hard to process".

This tool is suitable for night time unattended operation and dry (no oil lubrication on the sheet metal) condition punching.

Most efficient in long life and cost !

Conic Long Life Punch (CLP)

High performance for all purpose, especially for mild steel, galvanized steel with high corrosion resistance !

Special shapes are also available for this treatment.

Ultra cost performance tool for reasonable price !

Conic Hard Punch (CHP)

Reasonable price and suitable for all purpose.

CHP shows high performance reducing adhesion and galling which is more likely to be caused by processing Aluminum and Coated steel sheet.
